Instructions For Using Automatic Telephones

Obtain the correct telephone number from the directory before attempting to make a call. If it is difficult for you to remember the number write it down before attempting to dial. If the person or firm is not in the directory, Dial "Information" (493).

Never try to remember a telephone number. It's all right if you do remember, but to try to remember is to begin to guess. If you have the least doubt about it, look it up and thus save time and trouble.

Dial "Information" (493) when you can't find the telephone number you want, or to get answers to any question regarding subscribers' names, numbers, or addresses.

HOW TO DIAL:

Remove the receiver from the hook, being careful not to "jiggle" the hook in doing so as it will cause you to get a wrong number.

Always listen before you start to dial to be sure that the line is not in use. If a conversation is heard, hang up the receiver and wait until you believe the conversation is completed before making another attempt.

To dial any figure or letter, place your finger firmly in the hole in the dial associated with such figure or letter. Pull the dial around until your finger strikes the finger stop. THEN REMOVE YOUR FINGER and let the dial return to rest without touching it. Any attempt to hasten or retard its motion will interfere with the operation of the equipment and probably result in a wrong number. Each letter or figure must be dialed in its consecutive order to obtain the desired numbers.

Always allow the dial to come to a full rest before dialing the next figure. Too rapid dialing does not permit the apparatus associated with the dial to function completely.

Do not move the dial before removing the receiver or in the act of removing the receiver, as a part of the dialing may be completed before the receiver hook is fully released. A wrong number would result.

Do not move the dial while talking as it will break the connection.

Do not replace the receiver while dialing.

Do not move the receiver hook up and down after you have established a connection or before you have finished talking, for to do so will break the connection.

If the party to whom you are talking is disconnected, hang up your receiver for a few seconds and, if you are the calling party, dial the entire number again. If, however you were called by the person to whom you have been talking and disconnection occurs, hang up the receiver and wait to be called.

If party desired is on your line follow instructions on PARTY SUBSCRIBERS RING BACK NUMBER CARD.

IMPORTANT:—If, before you complete dialing, you find that you have made an error, or if your finger slips out of the hole while dialing before you have pulled the dial around to the stop, hang up the receiver for a few seconds. Then take the receiver off and dial the entire number again.

WAIT FOR RINGING SIGNAL OR BUSY SIGNAL. After dialing is completed, place the receiver to your ear and wait for the "ringing" signal or "busy" signal. Either the "ringing" signal or the "busy" signal should be heard soon after you have completed dialing. If neither the "ringing" signal nor the "busy" signal is heard and no operator answers, replace the receiver on the hook for a few seconds and dial the number again. It, after a second attempt to call a number, you have not heard either the "ringing" signal or the "busy" signal, dial 492, Complaint Department, and report to them.

Ringling Signal is an intermittent "burring" sound. This signal heard at intervals after you have completed dialing, informs you that the bell of the called telephone is ringing. You will understand from the audible ringing signal that the called station is being rung and will continue to ring as long as the called subscriber does not answer and the receiver of the calling station is off the switchhook. Hang up your receiver when you think the called party has had time to answer but has not answered.

The Busy Signal is a rapid "buzz-buzz-buzz" sound. This signal heard after you have dialed informs you that the called line is busy. If you are calling a station which is on a party line it does not necessarily mean that the particular telephone called is busy, but that some telephone on the same line is in use. When you hear this "busy" signal, hang up the receiver and call again a little later.

HANG UP THE RECEIVER AFTER YOU HAVE FINISHED TALKING to disconnect your telephone from the telephone you have called.

KEEP THE RECEIVER ON THE HOOK FOR A FEW SECONDS BEFORE MAKING ANOTHER CALL. If you wish to make a second call after completing the first, it is necessary to hang up the receiver for a few seconds before starting to dial to give the equipment time to break the first connection. Likewise, after receiving an incoming call an attempt to dial a number should not be made for a few seconds after you have hung up the receiver.

P. S. By-the-way, when you know that a false call is due entirely to your careless use of the wrong number, why not acknowledge it to the "innocent bystander" who answers the call? Why leave the Telephone Company to shoulder the blame?

Advertise you have a telephone, **BUT DON'T PUT ITS NUMBER ON YOUR LETTER HEADS, CARDS OR AUTOS.** Why? Because this only increases the amount of trying to remember such numbers by the public, also the continued use of obsolete numbers—which in turn only hurts the service and doesn't help your business at all. Think this over. We reserve the right to change telephone numbers at any time, without notice.

The use of profane or obscene language over the wires is positively forbidden, and the use of the local lines limited to five minutes. The Company reserves the right to disconnect or remove a telephone without notice for such cause.

VERBAL ORDERS CANNOT BE RECEIVED FOR NEW SERVICE OR CHANGES. SUBSCRIBERS VACATING PREMISES SHOULD ARRANGE FOR CLOSING BILL, OTHERWISE THE COMPANY HOLDS THEM RESPONSIBLE FOR ALL CHARGES.

The Car You Drive

Should answer certain definite requirements as to equipment and quality
